

Increase Efficiency and Turnaround Schedules with Better Understanding of Heat Exchangers

Reduce Production Loss | Proactively Monitor KPIs | Optimize Maintenance

Available Now! Heat Exchanger Monitoring Package

To get the Heat Exchanger Monitoring Package, contact your local Emerson representative.

Package Includes:

- Plantweb Insight Platform
- Plantweb Insight Heat Exchanger App
- Emerson 1410D Gateway with 781 Field Link
- 8x Rosemount 648 Wireless Temperature Transmitters with X-well technology
- 8x 0085 Pipe Clamp (10" SST)
- 2x Rosemount 3051SFC Wireless DP Flowmeters
- 4x Emerson 701P SmartPower Modules

Predictive and continuous heat exchanger monitoring helps optimize cleaning for enhanced production and energy efficiency. Emerson's heat exchanger monitoring solution provides immediate visibility into heat exchanger health and models to help users cut maintenance costs.

This package provides monitoring of shell and tube heat exchangers by analyzing data coming from Emerson Wireless devices. The pre-built algorithms deliver actionable information based on process experience and expertise.

Get started with this beginning package to seamlessly begin monitoring dual heat exchanger trains.
